The following are the 10 model providers

1. OpenAI — Creator of GPT-series and reasoning models like o3.

2. Google (Google DeepMind) — Developer of the Gemini family and Gemma open-weight models.

3. Anthropic — Builder of the Claude assistant and reasoning model lineup.

4. Meta — Creator of the open-source Llama model series.

5. Mistral AI — Paris-based developer of open and commercial high-efficiency LLMs.

6. DeepSeek — Known for cost-effective, high-performance open-source models like DeepSeek-R1 and V4.

7. Alibaba Cloud (Qwen) — Provider of the Qwen foundation and multimodal model family.

8. xAI — Developer of the Grok model series.

9. Cohere — Enterprise-focused natural language processing and Command model provider.

10. Amazon (AWS / Amazon Bedrock / Nova) — Major host and builder of foundation models via Amazon Bedrock. [1, 2, 3, 4, 5, 6]

Major AI models released over the past 12 months (late 2025 to late 2026) span top frontier labs:

Anthropic

* Claude Opus 5.5 / Sonnet 5.5 / Haiku 5.5 (Late 2026): Flagship multimodal intelligence and speed updates with a 1M+ token context window via [Traictory](https://traictory.com/model-list).

* Claude Fable 5.1 (September 2026): Specialized for complex coding and deep multi-step reasoning. [1, 2]

OpenAI

* GPT-6 (Astra / Rosalind) & GPT-6.1 (Terra / Sol) (October 2026): OpenAI's next-generation frontier family featuring high-level agentic and multimodal performance.

* OpenAI o1 Series (Late 2025/2026): Advanced reasoning-focused models (o1-preview and o1-mini) built for deep thought and complex math/coding. [3, 4]

Google

* Gemini 4 (Carbon / Argon) (October 2026): Google's latest multimodal frontier family topping major intelligence and speed leaderboards.

* Gemini 3.1 Flash / Lite (Mid 2026): High-efficiency low-latency models for real-time tasks. [1, 3, 5]

Other Notable Models

* Qwen 3.5 (Alibaba Cloud, February 2026): Expanded open-weight multilingual series supporting over 200 languages and dialects.

* DeepSeek V4 / V4.1-Flash (DeepSeek, October 2026): High-efficiency open/mixture-of-experts model releases with 1M context support.

* Kimi K3.1 Pro (Moonshot AI, October 2026): Long-context reasoning and code-focused flagship.

* MiniMax M3.1 Flash (MiniMax, October 2026): Lightweight fast multimodal model. [4, 6, 7]
